

# GATE CHURCH CARBON SAVING PROJECT

## Make a Pin Cushion

### What Do I Need?

scraps of material  
elastic band or string  
scissors

container - this can be anything at all. We used a teacup and saucer and a child's first shoe

## Step 1

make a ball out of your scraps of material  
or you can use an old pair of socks, rolled up tightly

## Step 2

Cut out a piece of material big enough to cover the ball

### Step 3

Pull in the corners of the material and fasten with an elastic band or piece of string

### Step 4

Pop it into your chosen container, making sure only the top 'ball' is visible

How lovely is that?
